

Pierre-Alex Crisinel studied medicine at the University of Lausanne in Switzerland. He obtained his medical degree in 2000. He then trained in pediatrics at the CHUV in Lausanne, obtaining his specialist diploma in 2006. He then moved to Ste-Justine Hospital in Montreal, Canada, for 2 years of further training in pediatric infectious diseases. On his return to Switzerland, he completed his training in pediatric infectious diseases at Geneva University Hospitals (HUG), where he also trained in vaccinology with Prof. Claire-Anne Siegrist. He obtained his specialist diploma in infectious diseases in 2012, and joined the team of Swiss vaccine experts (INFOVAC) in 2013 and the Federal Commission for Vaccinations in 2021. He is currently the head of the Pediatric Infectious Diseases and Vaccinology Unit at Lausanne University Hospital. His current clinical research focuses on strategies to increase vaccination coverage
